

Overview

Sifam Controls, a division of Devlin Electronics Ltd, is pleased to provide the slim line illuminated two shot push-on fader knob. Knobs are moulded as standard with black bodies and transparent lines. The knob can also be specified in alternative colour combinations to suit particular design applications.

Sifam's fader knobs are designed and shaped to provide a stylish appearance with ease of control. The extensive range, available in hard or soft touch finish, is intended to suit the needs of both applications and users. The soft touch finish versions compliment Sifam rotary push-on knobs with the same finish.
